

Green Genius

A renewable energy company
that makes a difference

Where we operate

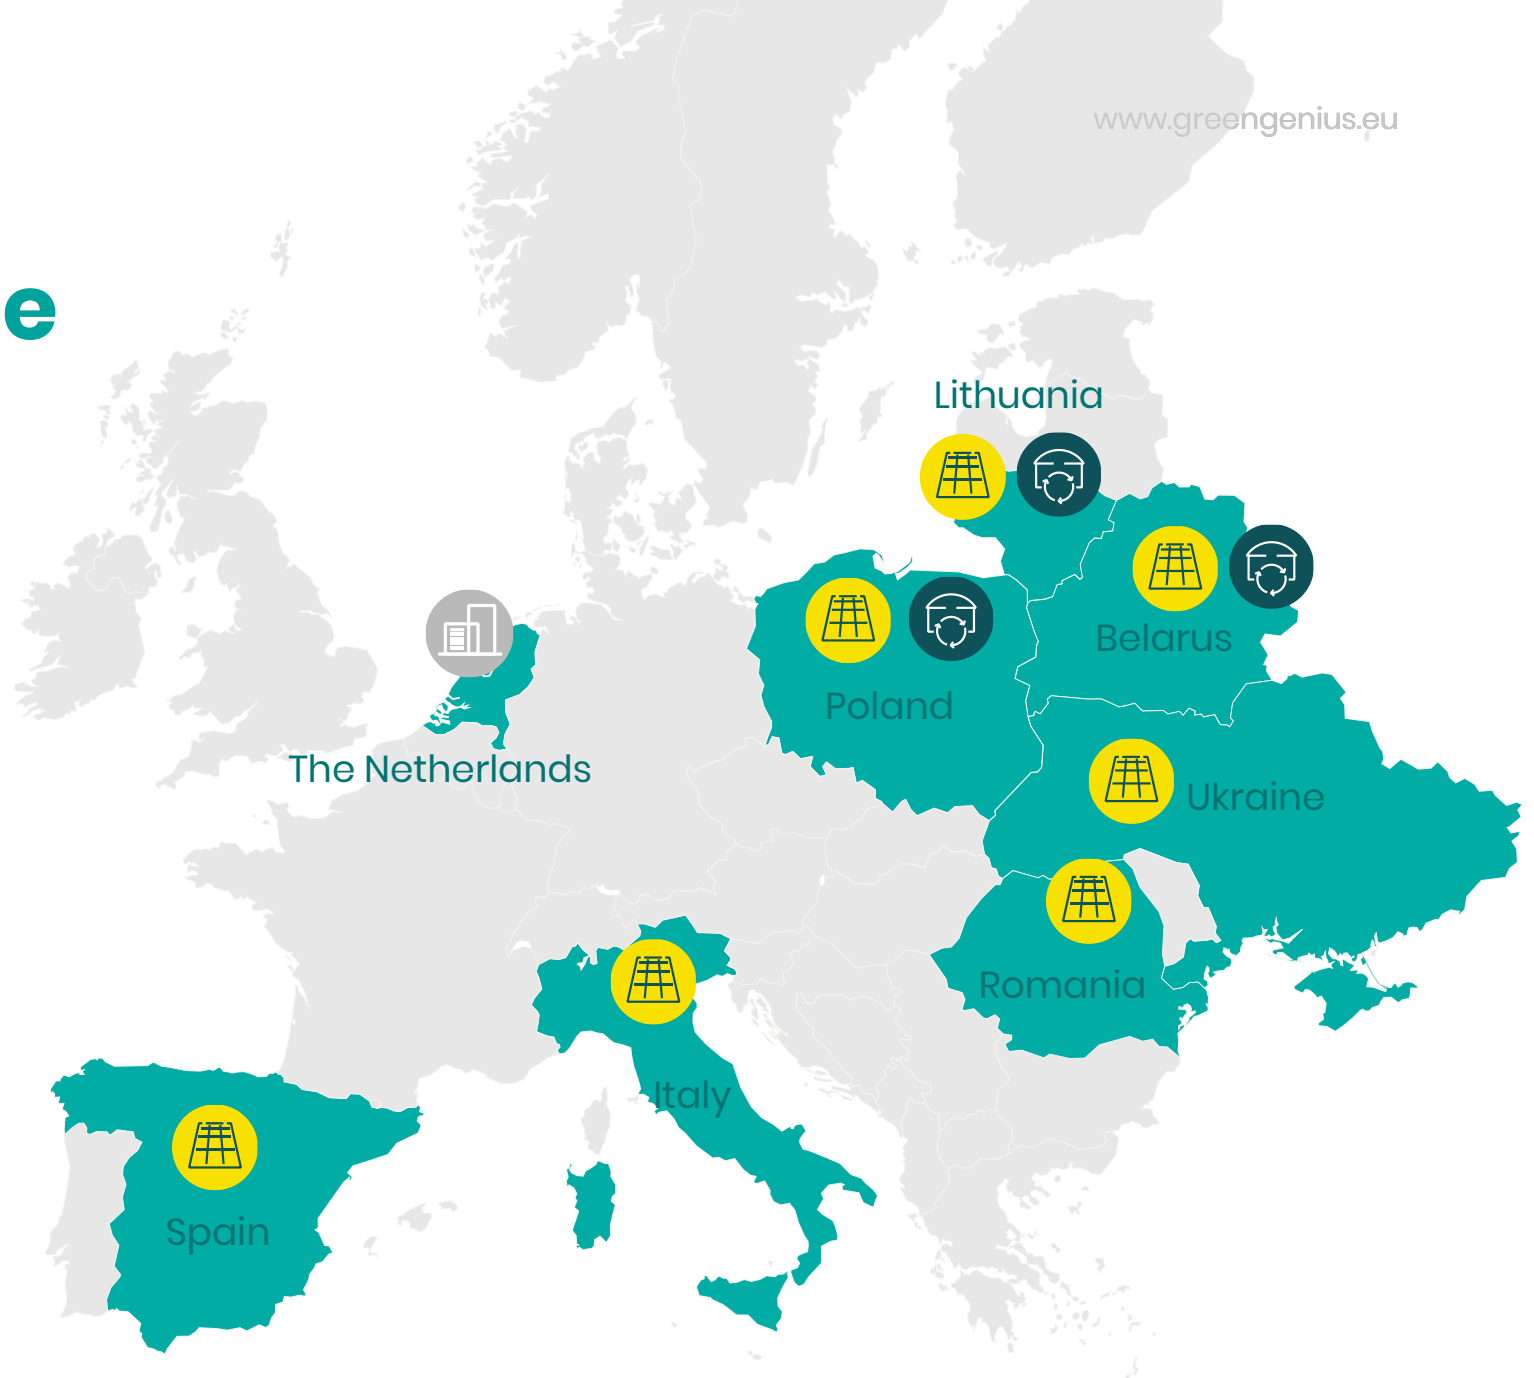

Solar power projects

more than **155 MW**
operating power plants
in all markets

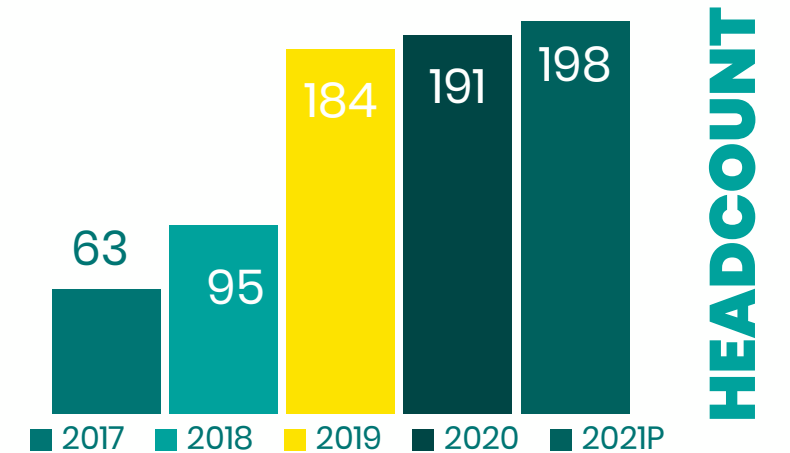

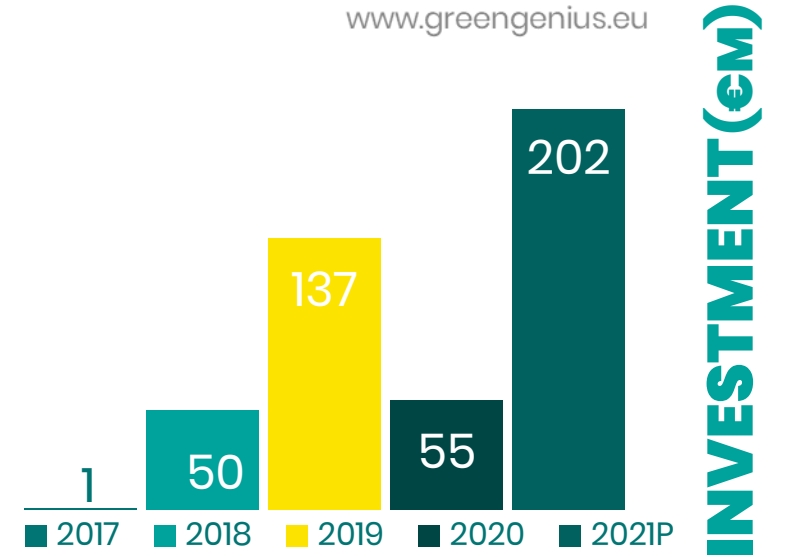

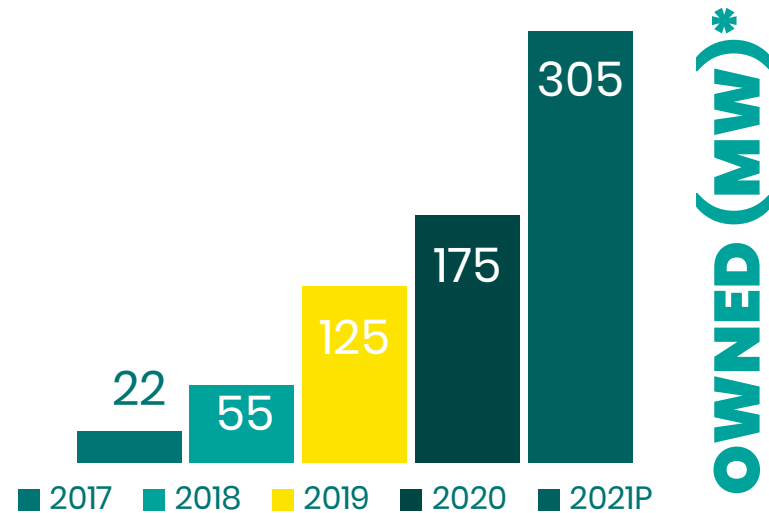

Biogas projects

more than **20 MW**
operating power
plants in all markets

2017-2021P

Main financial figures

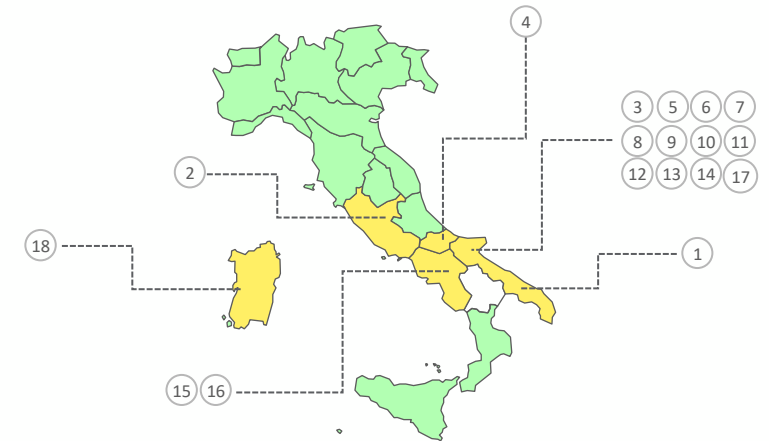

*Cumulative of built large scale Solar and Biogas.

Italian PV portfolio overview

- Italy's energy strategy places high importance on solar PV.
- We expect, that phase-out of coal power will increase the demand for the renewable energy even further.
- The current portfolio of Solar PV projects under development by **Green Genius** is of more than **670 MW**, encompassing **18 projects in 5 different regions of Italy**.
- The estimated investment over the **upcoming 4 years will reach more than 400 million EUR**
